Schedule Overview:

Our schedule reflects a 4 + 1 system. Every fifth week, each resident will have a "clinic" week. These weeks will be staggered across the residency so that 20% of the residency will be on their "+ 1 week" at any given time. This model assures that residents do not attend to inpatient and outpatient responsibilities simultaneously.

Residents will have the opportunity for elective rotations in the following internal medicine subspecialties: Cardiology, Hematology, Oncology, Nephrology, Gastroenterology, Infectious Diseases, Endocrinology, Pulmonary Disease, and Rheumatology.

Residents will have the opportunity for experience in the non-internal medicine sub-specialties: Psychiatry, Allergy/Immunology, Dermatology, Medical Ophthalmology, Office Gynecology, Otolaryngology, Non-Operative Orthopedics, Palliative Medicine, Addiction Medicine, Sleep Medicine, and Rehabilitation Medicine.
